

VINOCOLOR INFORMATION SHEET

VINOCOLOR is an original 100% natural red stain manufactured by Ab Antiquo, based in Saint-Cannat in the French Riviera. It is packed in small 100 gram, 500 gram, and 1 kg containers. By applying it to their barrels, winemakers bring a brighter color to their barrel facility and hide potential splashes of red wine, while avoiding fungus development. Extracted from red wines and grapes by lyophilization (dry-freeze), this high tech stain is food-grade, safe and easy to use.

DIRECTIONS

1. In a container, add approximately 100 grams of Vinocolor to 1 liter of water.
(1 liter should cover close to 40 barrels)
2. Stir well.
3. For best results, use a firm sponge or brush and apply two to three coats.

M.S.D.S. INFORMATION BASED ON MANUFACTURER'S DOCUMENTATION

Section One: General Information

Trade name: Vinocolor, reference 70 007 and 70 012

Chemical family: Polyphenols

Manufacturer's name & address:

Ab Antiquo | 1000A Avenue de l'Europe | 13760 Saint-Cannat | France

Tel: 011-33-4-28-70-67-34 | Email: contact@vinocolor.fr

Section Two: Hazardous Ingredients/Identity Information

None

Section Three: Physical & Chemical Characteristics

Solid. Dark red power. Freely soluble in water. Astringent taste. Red wine odor.

Section Four: Fire & Explosion Hazard

None
